Summary

Software Engineer with experience in Java enterprise systems and Python/Django development. Recognized DSF Individual Member and Django core contributor with 20+ pull requests to production-scale open-source infrastructure. Skilled in building scalable REST APIs and database-driven systems for national-scale applications.

Experience

Beshara Group

Nov 2025 – Present

Java Developer

Cairo, Egypt

- Developed and deployed enterprise features for Kuwait Civil Service Commission across **5+** environments, serving **47** ministries and **40** subsystems within **6-tier** Java EE architecture powering national government operations.
- Added Job-to-Work-Center authorization validation across **25,100+** jobs and **25,400+** work centers.
- Optimized Oracle queries by redesigning multi-table joins into indexed comparison views, reducing validation latency.
- Collaborated across Agile/Scrum environment with QA, developers, and Product Owner using Jira for sprint planning, issue tracking, and bug validation; received mentorship from seniors and tech leads and onboarded juniors to the codebase.
- Tech:** Java · EJB · JSF · Oracle DB · Ajax · JDeveloper · Git

Django Software Foundation

Jan 2025 – Present

Open Source Contributor

Remote

- Selected as **Individual Member** of the DSF, my contribution endorsed by members and approved by DSF Board.
- Contributed to Django core, used by **2M+** projects globally, authoring **20+ Pull Requests**, including **9 Merged** PRs.
- Officially recognized in **Django Authors** as Much-Appreciated Contributor for significant impact in Django.
- Added **3,000+** lines of code across Django core, documentation, security, database, testing, and UI improvements.
- Engaged with the community via code reviews, forum discussions, and discord collaboration to enhance code quality.
- Enhanced web security** by defaulting to HTTPS and deprecating insecure HTTP fallback.
- Resolved critical Django admin crash** by gracefully handling invalid UUIDs in content types.
- Enabled overriding GenericForeignKey** in abstract models for improved ORM flexibility.
- Improved test suite reliability** by refactoring i18n translation overrides for consistent discovery and execution.
- Fixed internationalization errors** by restructuring ngettext for accurate multilingual translations.
- Fixed Safari SVG rendering issues** in dark mode for better cross-browser UI compatibility.
- Added FileField testing guidance** using LazyObject to improve storage backend testability.
- Tech:** Python · Django · DRF · PostgreSQL · JavaScript · Unit/Integration Testing · GitHub Actions · Git

Nile University

Jul 2025 – Aug 2025

AI Researcher Intern

Cairo, Egypt

- Built **AI Advising System** with **100%** eligibility validation, **78%** GPA prediction accuracy, and **84%** ranking fidelity.
- Automated a pipeline from data ingestion to LLM-enhanced recommendations, processing **6000+** student transcripts.
- Tech:** Python · Machine Learning · LLMs · Jupyter Notebook · Git

Orange Digital Center

Sep 2024 – Oct 2024

Software Engineer Intern

Cairo, Egypt

- Developed Task Management System using Java and Spring Boot with CRUD operations and user authentication.
- Built Finance Management CLI in C++ with automated balance tracking and budget notifications.
- Tech:** Java · C++ · Spring Boot · SQL

Information Technology Institute

Jul 2024 – Sep 2024

Web Development Intern – Fully Funded Scholarship

Cairo, Egypt

- Built Movie Website using React with user authentication, film rating, favorites functionality, and movie info display.
- Created E-commerce Platform featuring user authentication, shopping cart, order tracking, and searchable products.
- Tech:** JavaScript · React · Python · Django · PostgreSQL · Firebase · APIs · HTML · CSS · SQL · Bootstrap · Tailwind

Education

Modern Academy in Maadi

Sep 2021 – Jun 2025

Bachelor of Computer Science

Cairo, Egypt

- **CGPA:** 3.6/4.0
- **Graduation Project:** [Egypt Metro Platform](#) (Grade: A+)
- **Coursework:** Databases, Data Structures, Algorithms, OOP, Operating Systems, Software Engineering, Mathematics.

Skills

Programming Languages: Java, Python, C++, C#, JavaScript, TypeScript, SQL, HTML, CSS

Frameworks & Libraries: Django, DRF, Spring Boot, EJB, JSF, Node.js, React, Bootstrap, Firebase, Ajax

Tools & Platforms: Git, GitHub, Azure, AWS, Docker, Kubernetes, Linux, Postman, Jira, Kafka, Jenkins

Databases: PostgreSQL, MS SQL Server, MySQL, SQLite, Oracle, MongoDB

Concepts: OOP, SOLID Principles, System Design, Design Patterns, Agile, Microservices, CI/CD, Open Source

Languages: Arabic (Native), English (Advanced), German (Intermediate)

Projects

Portfolio | *React · JavaScript · Node.js · Firebase · HTML · CSS · GitHub Actions*

[GitHub](#) | [Live](#)

- Implemented interactive personal portfolio with animated backgrounds, dynamic content, smooth scrolling, dark/light themes, fully responsive design, lazy-loading, custom scrollbar, and UI/UX design.
- Integrated Firebase for data management, EmailJS for contact forms, Google Analytics for user tracking, SEO optimization with Google Search Console, and automated CI/CD deployment using GitHub Actions.

Egypt Metro Backend | *Python · Django · PostgreSQL · JavaScript · HTML · CSS*

[GitHub](#)

- Engineered scalable Django backend for the Egypt Metro platform to digitalize the metro transportation for passengers and administrators, designed to serve millions of users daily.
- Created **60+** RESTful APIs using DRF integrated with Mobile Application, AI Models, and Embedded Systems.
- Built online ticketing and subscription systems with QR code, JWT authentication, and payment gateway integration.
- Provided real-time train tracking, crowd analytics, and trip details including route, price, and time.
- Deployed the backend & AI services, and PostgreSQL database on Render and documented using Swagger/ReDoc.

Pizza Ordering System | *Java · SQL*

[GitHub](#)

- Built pizza ordering system with user authentication, real-time order, and MS SQL Server using Java, and Java Swing.
- Implemented Dijkstra's algorithm for optimal delivery routes and dynamically calculate delivery time and charges.

Chat Application | *Java · SQL*

[GitHub](#)

- Implemented multi-threaded TCP/IP chat application in Java with real-time messaging and file/image transfer.
- Designed modular client-server architecture with SQL persistence, Java Swing GUI, and OOP principles.

Achievement

Founder, Software Engineering Community

[GitHub](#) | [Discord](#)

- Created a central hub for Software Engineering opportunities and resources worldwide at FAANG, including internships, open-source contributions, mock interviews, events, hackathons, learning platforms, coding competitions, and more.
- GitHub Repo achieved **480+** Stars, **17+** Forks, & **16+** Watching and Discord Server supports over **1000+** Members.

Champion, Enactus Modern Academy

[Certificate](#)

- Led team to **1st** place victory among **20** competing teams in an Entrepreneurship Competition by developing and presenting an innovative business solution to industry judges.

Activities

Software Engineer, GDSC Cairo University

[Certificate](#)

C++ Developer, GDSC Al-Azhar University

[Certificate](#)

Event Organizer, Techne Summit in Cairo

[Certificate 2023](#) | [Certificate 2024](#)

Event Organizer, Egypt Career Summit

[Certificate](#)
